RA17

THE COMFORT YOU DESERVE

The EcoNet™ Enabled Rheem *Classic Plus*™ Series Two-Stage Air Conditioner offers the solid technology and energy-saving performance you've come to expect from Rheem. It's the quiet indoor comfort your family deserves.

RA17 *Classic Plus*™ Series

Efficiency: up to 17 SEER / 13 EER

Quiet and Efficient

Our new air conditioners are designed to perform both efficiently and quietly, delivering home comfort you can count on when you need it most.

Increased Comfort

The Two-Stage Copeland Scroll™ UltraTech™ compressor provides more precise temperature control and humidity levels for increased comfort.

EcoNet

This innovative technology allows you to control your comfort from home or away.*

INTEGRATED HOME COMFORT

Rheem.com

We Thought of Everything... And Then Some

The EcoNet™ Enabled Rheem *Classic Plus*™ Series Two-Stage Air Conditioners were developed using our 360°+1 design philosophy, which means every detail of the product is meticulously evaluated from every angle. We consider the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your Rheem Air Conditioning unit to bring you and your family years of comfort.

EcoNet is smart new technology developed exclusively by Rheem that allows Rheem Heating, Cooling and Water Heating products to communicate with each other on one integrated network.

Count on Staying Cool and Comfortable

A smart, efficient design makes the EcoNet Enabled Rheem *Classic Plus* Series Two-Stage Air Conditioner one of your best options for staying cool inside. Each new unit includes a generous list of features that work together to bring you quiet, efficient and reliable indoor comfort.

The reliable and legendary **1 Two-Stage Copeland Scroll™ UltraTech™ compressor** makes the *Classic Plus* Series as efficient as it is durable. A Single-Stage unit runs at one speed, but the Two-Stage RA17 modulates between two speeds – high and medium. It will operate on medium speed most of the time, providing more precise temperatures and lower humidity while also reducing energy use. The system only operates on high when necessary during peak, warm weather conditions. The compressor also has 70% fewer moving parts – which means you get a unit that's more efficient and more reliable. The **2 optimized fan orifice** contributes to quieter operation, optimal airflow and better overall performance. Simply put, you get efficient comfort that lasts a very long time.

A quieter and more durable unit starts with our smart new **3 composite base pan**. The design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure that the base pan stays looking new for years to come. Our improved refrigerant tubing design also contributes to a quieter, more reliable operation. For added strength, **4 curved louver panels** and **5 rugged corner posts** on the exterior do an excellent job protecting the inside.

Curb appeal is not lost on our new *Classic Plus* Series. Our air conditioners look as good as they operate. Modern cabinet aesthetics allow your unit to put its best face forward, and a powder coat paint system provides a lasting professional finish.

System setup is hassle-free with EcoNet, which automatically configures your system's airflow for optimal performance. And with EcoNet's 60 points of diagnostics, your independent Rheem Contractor receives extensive diagnostics information, taking the guesswork out of repairs.
